Is Balbix exposure management right for you?

Balbix cyber risk and exposure management platform enables you to ingest data from all your current IT and security tools and gain unified visibility into all assets, applications, and exposures.

Balbix goes beyond severity and threat intelligence, and takes asset criticality and mitigating controls into consideration to prioritize risks that can truly impact your business.

Balbix requirements

Deployment Options

Cloud-Based SaaS: Requires internet access, no additional hardware.

Hybrid: On-premise connectors for secure synchronization with local data sources.

Integrations

Balbix supports 100+ native integrations with various tools. Most organizations ingest data from 4 to 6 tools into Balbix. Below are a few of our integrations:

- 
Vulnerability Scanners
- 
ITSM/CMDBs
- 
Endpoint Security
- 
Cloud Security
- 
SIEMs and SOAR
- 
Ticketing Systems
