ANAGRAMS

So, you think you know it all? Unscramble these common security terms in less than 5 minutes. And if you can't, perhaps it's a sign that you need to spend less time Netflix and Chillin' and more time Infosec Drillin'. 😊

1. DILEMMA END HINT _____
2. PRINCE TONY _____
3. ALIEN BLURT IVY _____
4. ENVY NITRO _____
5. INTO THE NAUTICA _____
6. OFT ERR CUBE _____
7. DIRT EARN HEIST _____
8. BEN TOT _____
9. CUBES ICY RETRY _____
10. EXPERT HITCH _____

PUN INTENDED

I set my wi-fi password to 2444666668888888.

When someone asks me what it is, I respond with, “12345678.”

Don’t use beef stew as a computer password.

It’s not stroganoff.

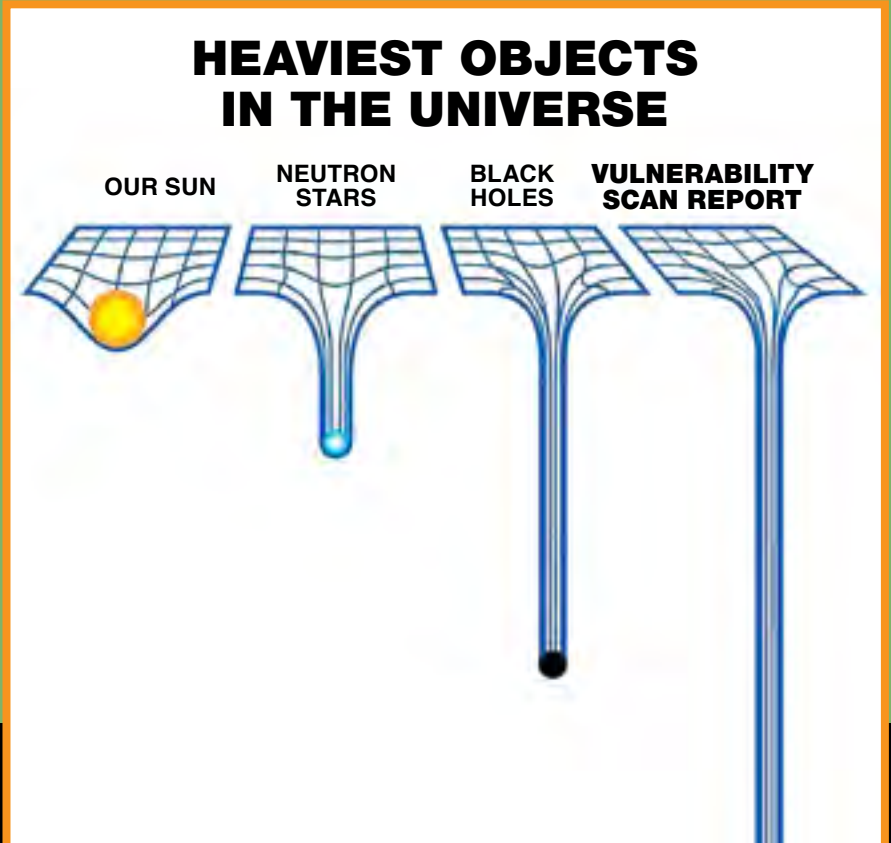
What do cats and security pros have in common?

When either one is unusually happy and excited, an appropriate question would be, “did you find a bug?”

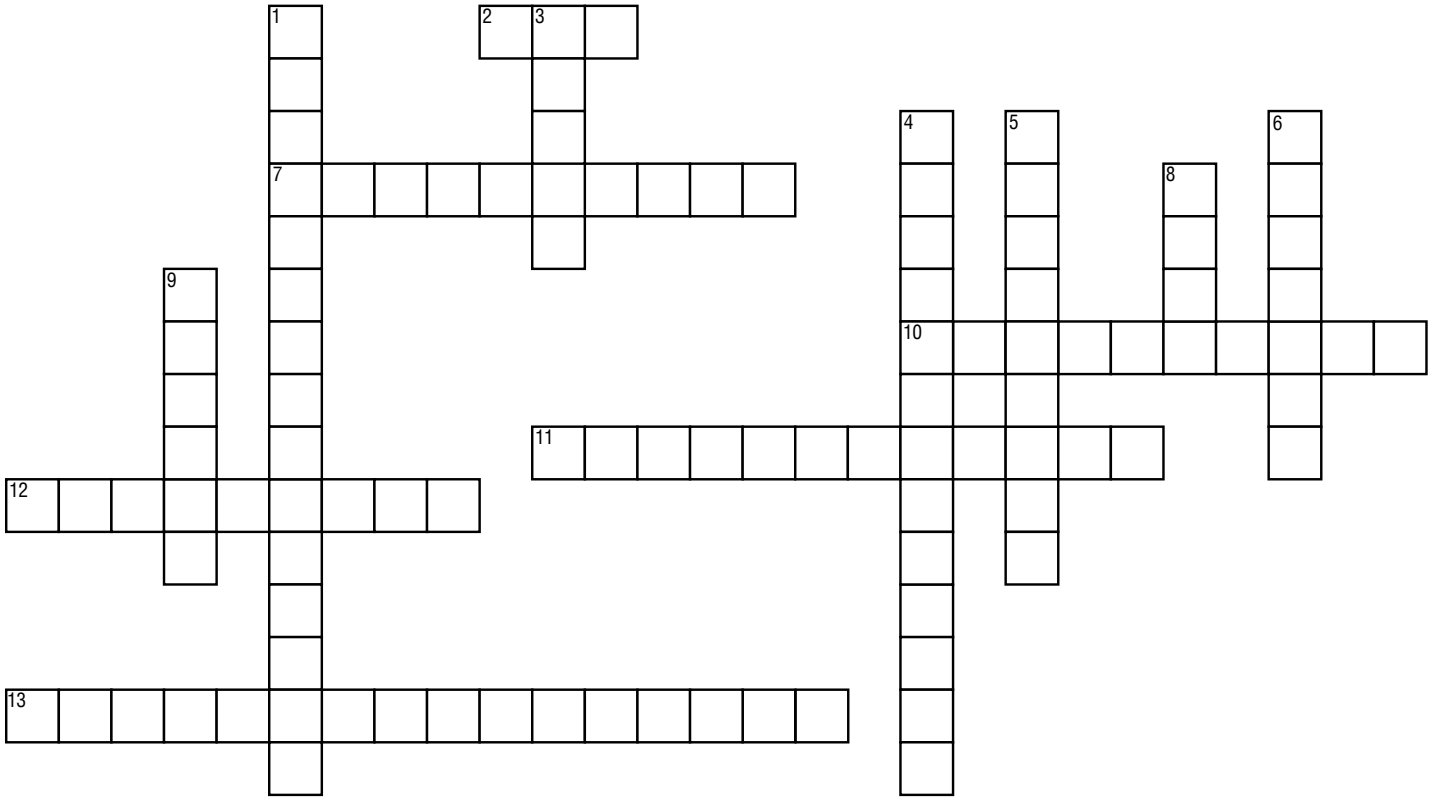
I tried to change my password to Fortnite.

But apparently, it’s two week.

A man asks for the wi-fi password at a bar. The bartender replies “Buy a beer first.” So, the man orders a beer and asks the bartender again. He replies: “Buy a beer first, no spaces, all lowercase.”



IDENTIFY YOUR ATTACK SURFACE



ACROSS

2 A program that can automatically perform some simple repeated task to reach a pursued goal

7 Using a social network to create an account with a fake identity to deceit a person

10 A vulnerability that enables attackers to gain complete control over targeted computers and Linux-based routers with CGI-based web interfaces.

11 A malicious technique by which a victim is tricked into clicking on a URL, button or other screen object other than one intended by or perceived by the user

12 A software or hardware means by which the keystrokes of a user are recorded as they type

13 A setting that violates a policy or that permits or causes unintended behavior that impacts the security posture of a system

DOWN

1 The activity related to researching, testing, approving and installing updates and patches to computer systems

3 An Internet community focused on understanding web technologies and exploitations

4 The means and mechanisms of managing access to and use of resources by users

5 A security mechanism prohibiting the execution of any program that is not on a pre-approved list of software

6 Taking advantage of a vulnerability to cause unintended or unanticipated behavior to occur

8 An attack which attempts to block access to and use of a resource

9 A man-in-the-middle exploit taking advantage of a flaw in the SSL/TLS protocols

CYBERSECURITY IN EMOJIS

Can you identify the cybersecurity terms below?

1. _____

2. _____

3. _____

4. _____

5. MID DLE _____

6. P _____

7. _____

8. U _____

9. _____

10. _____

11. _____

12. _____

13. _____

14. _____

15. _____

16. _____

17. _____

18. Y _____

19. _____

20. S _____

Are you practicing GOOD CYBER HYGIENE?

- ☑ Change passwords quarterly
- ☑ Don't reuse passwords between work and personal
- ☑ Update software when prompted
- ☑ Only download from sources you trust
- ☑ If you must use public wi-fi, use a VPN
- ☑ Avoid insecure websites
- ☑ Think before you click
